The meeting was virtual and the topic was the status of the project tasks in a situation of quarantine because of COVID-19.

All participants were happy that we could see each other and in a good health.

Prof. Filippo Spertino joined the meeting with a delay because the mail for the meeting was in his SPAM and all partners were very happy that the Italian partners are also in good health.

The situation because of COVID-19 was reported by all participants:

All universities in Mongolia and in the EU partner universities are closed.

The e-learning materials are very useful now and all partners which universities are in distant mode of education are using them actively.

Sarantuya Nadmidtseden, Rector of National Technical University of Mongolia:

“Due to the spread of Corona Virus COVID-19, the implementation of the project has been impeded. In Mongolia, all entities including educational institutes and universities have been quarantined and forced to shut down since the end of January, and due to low staff and unavailability to carry out our laboratory works, we kindly ask for an extension for the project.”

The conclusion with consensus was that the Mongolian universities can not implement the planned tasks because of the force majeure caused by COVID-19 and Slavka should inform the project advisor.
